Environmental IT Technician

THE COMPANY

Odotech (www.odotech.com) is an environmental company with a patented electronic nose specializing in the measurement and monitoring of odours at waste water treatment plants, composting sites, landfills, rendering plants and industrial plants. Recognized worldwide for its expertise and the quality of its solutions, Odotech exports to more than 20 countries. It offers engineering consulting services for odour impact evaluations and products for real-time measurement of odours. Its head office is located in Montreal with subsidiaries in France and Chile.

JOB DESCRIPTION

Odotech is currently looking for a multidisciplinary technician for its Montreal location. The successful candidate will be part of the OdoWatch Team for North America.
The key responsibilities will be:

- start-up of client servers (local or cloud);
- configuration of network and security elements;
- software configuration of the OdoWatch platform modules including the atmospheric dispersion models in collaboration with the environmental experts of Odotech;
- interact with customers (in person, by phone, by email or via VPN) to solve their problems (software, hardware, networks, radio, SCADA, etc.);
- periodic monitoring, of all OdoWatch platforms worldwide, to ensure a proactive support when problems arise. Communicate with the teams in France and Chile when platforms under their responsibilities are experiencing problems.

This position may also require supporting installation and maintenance technicians by joining them a few times per year to:

- install equipment at our clients' sites and perform preventive maintenance (industrial sites);
- perform onsite sampling of odour emissions in accordance with the appropriate methodology

The ideal candidate should meet the following requirements:
- a DCS in environment, networking or software;
- 3 to 5 years of relevant experience;
- experience with Windows and Windows Server;
- experience with VPNs (e.g. OpenVPN);
- experience with the IIS and PostgreSQL server components;
- is autonomous and resourceful;
- is willing to do fieldwork (10 ~ 15%);
- is able to travel abroad;
- French-English bilingualism (spoken and written) is mandatory.

The following characteristics are assets:
- ability to support applications based on the .NET framework.
- is comfortable with basic electronics and electrical measuring tools such as the millimetre;
- experience in on-site sampling (odors, gases, liquids or dusts)
- Knowledge of Spanish is a very important asset.

FAQ
- Odotech does not discriminate based on age, sexual orientation, religious or any other consideration;
- This position is a full time job at the Montreal head office.
- Odotech will not support the relocation expenses or costs for a work visa for Montreal, Quebec, Canada.
- Odotech has a generous benefits package.

RÉMUNÉRATION
- Depends on experience and qualifications
